UPCOMING EVENTS

- **Workshops for teachers 2026**
- **Cambridge goes to school**
- **Webinar for parents**

(See the third page for more information.)

Dove può portarti una certificazione Cambridge?

- Lunedì 16 marzo, ore 10:00
- Martedì 17 marzo, ore 10:00

Cambridge propone un webinar per tutta la classe, da proiettare sulla LIM durante le ore di lezione e seguire direttamente in aula o nell'aula magna della tua scuola, con la possibilità per gli studenti di fare domande in diretta! Esploreremo le certificazioni Cambridge English, i livelli linguistici, la qualità degli esami e il riconoscimento nazionale e internazionale.

Il webinar sarà tenuto in italiano.

Article Highlight

This slide is a sample from one of the several PowerPoint presentations created in class with real students (the mistakes are authentic, too 😊).

"Education is not only about knowledge, but about shaping confident and responsible individuals for life." - *Dr Adriana Iacono PhD*

Teaching Life Skills at School: Preparing Students for Real Life

In today's **rapidly changing world**, schools can no longer be places where students simply **learn facts** and receive information passively. Young people need to develop a **wide range of abilities** to face **real-life challenges** effectively. For this reason, teaching **life skills at school** has become **essential**.

Life skills such as **critical thinking, communication, self-awareness, and decision-making** empower students to **navigate complexity, manage uncertainty**, and build **meaningful relationships**. Education must therefore go beyond the **transmission of knowledge** and actively support the **holistic development** of each learner.

With this in mind, we have decided to dedicate our annual series of workshops to this **fundamental topic** (see details on the front page of this Newsletter). Through these workshops, we aim to explore **practical strategies** and share **best practices** to help educators integrate life skills into **everyday teaching**.

Teaching life skills also improves **academic performance**. First of all because they are **more motivated** and **more responsible of their own learning**. Second, when they learn how to **manage their time, set goals, and stay focused** are more likely to succeed in their studies. For example, in January with my youngest students I decided to start a short but effective module on **New Year's Resolutions** transforming **wishful thinking into real goals**. They chose the goals and the group to work with and the results were amazing also on the academic side. In fact, when students reflect on how to "*stop wasting time*" or how "*to get better marks*" or how "*to improve their handwriting*" or how to "*be more confident*," they are not only working on **personal growth** but also strengthening habits that directly influence their **school results**.

Moreover, life skills education promotes **well-being and inclusion**. When students develop **empathy, cooperation, and communication skills**, the classroom becomes a **safer and more supportive environment**. This encourages **participation, reduces conflicts**, and fosters **mutual respect**.

Another key aspect is **responsibility**. Learning how to make **informed decisions**—whether about personal habits or environmental issues—helps students become **active and aware citizens**.

In conclusion, by integrating life skills into **everyday classroom activities**, schools can help young people grow into **confident learners, responsible citizens,** and **emotionally balanced individuals** setting the foundation for their **lifelong success**.

For those interested in exploring this topic further, we invite you to access the attached link and read the full study:

"Using Literature to Improve Writing Skills at B1 Level: A Case Study in Italy"
by Dr Adriana Iacono PhD

The article offers valuable insights into how literature can effectively support writing development at B1 level, with practical reflections drawn from classroom experience.

Click on the link to read the complete study and discover how literature can become a powerful tool for improving students' writing and life skills.

E se l'Intelligenza Artificiale diventasse una leva cognitiva per ripensare la didattica?
Con #A lezione di metodolog-IA (ID 430193) esploriamo strategie e strumenti per progettare, personalizzare e valutare in modo consapevole, con attenzione a etica, inclusione e produzione di contenuti multimediali.

Il percorso è pensato in chiave laboratoriale: attività pratiche, esempi d'uso e piccole "officine" operative per sperimentare subito in prima persona e portare in classe idee e materiali pronti all'uso. Condivisione, confronto e sperimentazione guidata per trasformare l'IA in un alleato della progettazione quotidiana.

Formazione online - 25/02, 04/03, 11/03, 18/03 - 15:00–18:00
